YASH VERMA

Computer Engineering Student | Python | TensorFlow | Scikit-learn | FastAPI | PyTorch
Mumbai, Maharashtra | +91 9004039248 | yash06763@gmail.com | LinkedIn | GitHub | X (Twitter)

PROFILE

Third-year Computer Engineering student focused on Artificial Intelligence & Machine Learning, with hands-on experience across classical ML pipelines, deep learning and backend development in Python and FastAPI. Self-studied transformer architectures to strengthen understanding of modern NLP. Strong foundation in OOP and DBMS, with practical exposure to hackathons and applied AI projects. Open-source contributor with documentation work merged into public GitHub repositories through the pull-request workflow. Currently seeking an internship to apply these skills in a real-world setting.

TECHNICAL SKILLS

Languages: Python, SQL
Frameworks: Flask, Streamlit, FastAPI
ML/DL Libraries: Scikit-learn, TensorFlow, NumPy, Pandas, Matplotlib, Seaborn
Database: MySQL
Tools & Deployment: Git/GitHub, Docker, Vercel, Render, DagsHub, DVC
Core CS: OOP, DBMS, Computer Networks

EDUCATION

B.E. Computer Engineering — Bharati Vidyapeeth College of Engineering, Navi Mumbai
University of Mumbai | 2024–2028 | Semester 4 SGPA: 8.64

HSC (XII) — NES Ratnam Jr. College of Science, Bhandup, Mumbai | 73.17%

SSC (X) — NES High School, Bhandup, Mumbai | 92.60%

PROJECTS

Samadhan Setu – SIH 2026 Solution (Team Binary Beast, SIH26043)
Tech: Python, FastAPI, Gemini API, FAISS
- Built the AI layer of a digital platform connecting citizens' reported societal challenges with universities, industry and government stakeholders, covering classification, severity scoring, summarization and duplicate detection.
- Presented the AI pipeline along with the Feasibility/Viability and Impacts/Benefits analysis at the internal SIH round.

Support Ticket Complaint Classifier – CFPB Complaint Text Classification (MLOps)
Tech: Python, FastAPI, XGBoost, DVC, Docker, MLflow
- Built an end-to-end text classifier for CFPB consumer complaints (50,000 samples, 8 product categories), comparing Logistic Regression, XGBoost and fine-tuned DistilBERT, with all experiments tracked in MLflow.
- Selected XGBoost for production (test Macro-F1 83.26%), served it via a FastAPI app, versioned data/models with DVC, and deployed via Docker + GitHub Actions CI/CD to a live Render endpoint.

Next-Word Prediction LSTM
Tech: Python, TensorFlow, NLTK, tf.data
- Built a deployable next-word prediction language model, evolving from a single-corpus prototype to a multi-corpus architecture using the NLTK Gutenberg collection.
- Implemented a tf.data input pipeline with temperature-based sampling, and serialized trained artifacts for hosting/deployment.

Loan Approval Prediction
Tech: Python, Scikit-learn, XGBoost, GridSearchCV
- Built and tuned classification models (Logistic Regression, SVM, Decision Tree, Random Forest, XGBoost) to predict loan approval outcomes.
- Used sklearn Pipelines with ColumnTransformer and OneHotEncoder, and tuned hyperparameters via GridSearchCV for the best-performing model.

OPEN-SOURCE CONTRIBUTIONS

Documentation Contributor – Public GitHub Repositories
Tech: Git, GitHub, Markdown
- Contributed documentation improvements to open-source projects by forking, working on feature branches and raising pull requests, with contributions successfully reviewed and merged.
- Followed maintainers' contribution guidelines and kept changes tightly scoped and review-ready.

LEADERSHIP, POSITIONS & EXTRACURRICULAR

- **Internship Coordinator – Department of Computer Engineering:** Coordinating internship-related communication and workflows for students.
- **Technical Knowledge Sharing – Figma (Aug 2026):** Delivered a knowledge-sharing session for Software Engineering students on Figma and its use in design/prototyping workflows.
- **Organizing Team – IGNITE: AI-Based Fundraising & Investor Pitch Competition (Sep 2026):** Contributed to planning and execution of an investor-pitch challenge involving problem-statement launch, team scrutiny, business modeling and timed pitches.
- **Coordinator – Design Arena, National Startup Day 2026 (Jan 2026):** Coordinated stakeholders and participant flow for a design-thinking competition; supported real-time problem solving and event execution.

ACHIEVEMENTS

- Qualified for the internal Smart India Hackathon (SIH) 2025 round, from Team Binary Beast.
- Qualified for the internal Smart India Hackathon (SIH) 2026 round as part of Team Binary Beast, problem statement SIH26043 (Samadhan Setu).
